LinkedIn: <https://linkedin.com/in/ditwan> | **Portfolio:** <https://ditwanprice.com>

Software Engineer with 2+ years of experience developing impactful software solutions. Skilled in delivering high-quality code, collaborating with cross-functional teams, and adhering to code standards. Excellent written and verbal communication skills, a strong grasp of object-oriented programming principles, agile development methodology, and effective problem-solving ability.

SKILLS

Programming Languages: JavaScript, TypeScript, Python

Technical Skills: React, HTML, CSS, SCSS, Tailwind CSS, Git, Cypress, Node.js, SQL, PostgreSQL, Data Structures, Algorithms, RESTful APIs, Responsive Web Design, Figma,

PROFESSIONAL EXPERIENCE

Alto - Nashville, TN

May 2021 – May 2023

Software Engineer

- Developed a responsive web app for investor onboarding, reducing processing time by 50%.
- Streamlined development by building out React.js components for the new design system. Utilized Storybook.js to provide an interactive platform, significantly reducing overall development time.
- Collaborated with UI/UX design teams to redesign our dashboard resulting in a 25% increase in user engagement.
- Partnered with QA and testing teams to identify and address usability issues, improving the overall user experience by approximately 30%.

EDUCATION

Florida International University - Miami, FL

June 2018 - Dec. 2020

B.A. in Computer Science

PROJECTS

Spotify Stats Visualizer

- Developed a web app using React and Express.js to visualize Spotify music data, including top artists, tracks, and playlists.
- Implemented user login and authentication using the Spotify API.
- Utilized Framer Motion for fluid page transitions and interactive elements, and React Router's lazy loading for improved performance.

Browser Homepage Replacement

- Developed a personalized browser homepage using React, offering a customizable and informative experience for users.
- Incorporated the OpenWeatherMap API to provide real-time, dynamically updated local weather information within the browser homepage,
- Utilized the Quotes and Unsplash APIs to enrich the user experience with daily motivational quotes and captivating, dynamically changing backgrounds.
